Who's Yard Will We Use?

How much money will we need to get the garden ready?

- Will we need to rent or borrow a tiller?
- Will we create raised beds?
- Will we use containers?
- Will we need soil testing?
- How much soil will we need to buy?
- How much will we need for plants?

What basic vegetables or fruits do we plan to grow to benefit the whole group?

Can people plant a few of their individual favorites (such as okra, peppers...)?

How will we divide what comes in?

Who will care for the plants during the week?

Will we have a set pick-up time and date each week? Where will those be kept for quick and easy pick-up?

Will we have regular work days to keep the garden healthy?

Will we have a watering rotation among members?

How will the garden care, maintenance, & produce sharing work when a family goes out of town?
